

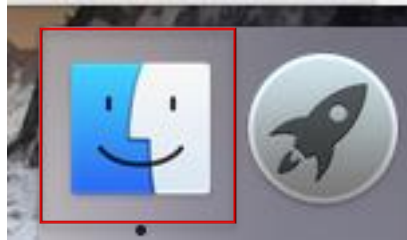

Mapping a Network Drive

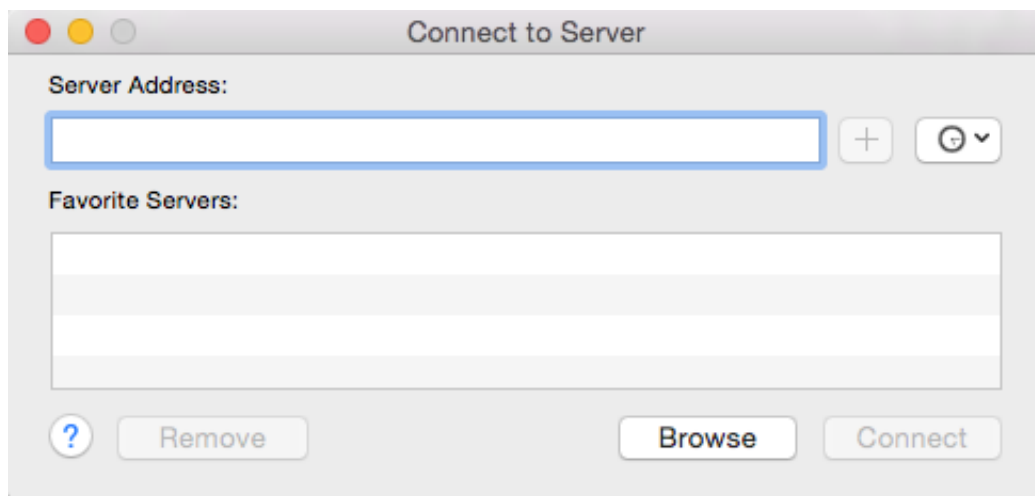

1 Mapping a Network Drive

Firstly open "Finder".

The "Finder" icon

Once in finder press Command+K on your keyboard. This will open the "Connect to Server" window.

The "Connect to Server" window

In the "Server Address" box enter the name or IP address of the drive you wish to connect to and then select "Connect".

When your computer has finished loading if prompted select the folder that you wish to connect to and select "OK".

You should now be able to access your network drive on the right hand side of the finder window.
